

Dear Senator

Promise the Children advocates for equitable, fair, and free public education for all children emphasizing a holistic perspective for their healthy development. Will you support this essential work on No Child Left Behind (NCLB)? Thank you.

- We support fully funded federal mandates and oppose the financial stress that NCLB now places on communities, schools, teachers, and students.
- We endorse well-rounded assessment tools rather than focusing solely on the use of test preparation and high-stakes testing.
- We support teacher education and development through ongoing training programs.
- We support funded tutorial programs for students rather than simply branding teachers and schools as "underperforming".
